CS 61A — Structure and Interpretation of Computer Programs

Fall 2026 · Section 03 · Instructor: Dr. R. Chen · Office hours: Tue 2–4 PM

Course description

This course introduces programming and computer science using Python, Scheme, and SQL. Students learn abstraction, recursion, and interpreters.

Grading

Component	Weight	Notes
Homework	15%	Weekly, lowest two dropped
Projects	35%	Four projects
Midterms	25%	Two exams
Final	25%	Cumulative

Weekly schedule

Week	Topic	Reading
1	Functions	Ch. 1.1–1.3
2	Higher-order functions	Ch. 1.4–1.6
3	Recursion	Ch. 1.7
4	Data abstraction	Ch. 2.1–2.3

Accommodations

Students with disabilities should contact the Disabled Students Program to arrange accommodations.

- Extended time on exams
- Note-taking support
- Accessible course materials
