Quarterly Accessibility Report

Office of Digital Services · Q3 2026

Summary

During the third quarter the office remediated 1,240 documents and reviewed 86 web properties. Conformance rose from 37% to 52% of top-viewed documents.

Methods

Documents were assessed with automated checks and manual screen-reader review using NVDA and VoiceOver.

Findings

- Scanned PDFs remain the largest category of failures.
- Untagged forms announce unlabeled edit boxes.
- Reading order errors affect 1 in 5 multi-column pages.

Next steps

Prioritize benefits letters and forms for remediation before April 2027.
